

How to Use the Reproducible

Copy to make an even number of watermelon slices from the pattern on white construction paper. Color the rinds green and the centers of the slices red. Cut out all the slices and mount half of them onto separate pieces of construction paper. Laminate the melon cards and the remaining slices for durability. Then cut the remaining slices so that each one fits together in a unique way. Vary the number of pieces according to the abilities in your group. Insert one melon card and one cut-up melon slice into a resealable plastic bag to make a puzzle kit. These puzzles serve up lots of fun, no matter how you slice 'em!
